

Ferrybridge Hydrogen

Public Consultation:
Monday February 10th
to Monday March 10th

SSE Thermal invites you to view plans and share feedback on its proposed Ferrybridge Hydrogen project.

SSE Thermal's Ferrybridge site in West Yorkshire holds a proud place in the UK's power generation story and is an ideal location for new technologies like hydrogen production.

In line with our commitment to deliver a low carbon future, we are proposing to build and operate a 50MW green hydrogen production facility at the site.

The project, known as Ferrybridge Hydrogen, will use renewable power to produce hydrogen which will be used by local and regional hard-to-abate businesses helping to decarbonise industries such as glass, construction materials and chemical manufacturers.

The proposed project, which could be one of the first green hydrogen plants in the UK, will provide a scalable solution for industry, helping to safeguard local jobs and businesses for decades to come.

We want your feedback on our proposals

You can help to shape our proposals by telling us what matters to you and your community. This includes your ideas to reduce or mitigate impacts during construction and operation or how the Project could benefit the community.

Please join us at one of the below drop in sessions to hear more about our plans:

- **Willow Green Academy** (Hampden Close, Knottingley) on Thursday 13th February between 2pm and 8pm.
- **Brotherton Parish Hall** on Wednesday 26th February between 2pm and 8pm.

There is no need to register attendance; please come along during these times at either date/ location to speak with a project team member, at your convenience.

If you are unable to attend an event in person, you can join our webinar which will take place on Thursday 27th February at 6pm. Registration and joining instructions can be found on our website:

www.ssethermal.com/FBH

The deadline for feedback on our proposals is 11:59pm on Monday 10th March, 2025.

Provide your feedback on our plans by joining us at one of our events or visiting our website and providing feedback online.
